A Day of Pampered Healing For Breast Cancer Patients

National Breast Cancer Awareness and National Acupuncture & Oriental Medicine Day

Harmony Health, Inc. is pleased to honor a special day for breast cancer patients who are currently undergoing therapy... our annual Day of Pampered Healing. We have all been impacted by breast cancer – whether it is our family, friends, co-workers, neighbors, or ourselves. The physical and emotional hardships endured leave you exhausted and weak. The side effects of cancer treatments often cause debilitating symptoms including menopause and sterility. Exploring complementary ways to improve the quality of their lives has brought many people undergoing cancer therapy to the ancient Asian tradition of Acupuncture and Oriental medicine. Yet this historically rich medicine represents a new era in the complementary treatment of this insidious disease. Acupuncture and oriental medicine are increasingly being used to reduce the side effects, boost immunity, support fertility, speed healing and provide much needed support that embodies the entire mind, body and spirit of healing. Perhaps just as important, is to give hope where hope has been lost.

On **Wednesday October 24th, 2007 from 10am–1pm** Harmony Health, Inc. will be hosting this Day of Pampered Healing in our office. The pampering treats will include general wellness acupuncture treatments, neck and shoulder massages, hand care, skin care / makeup consults, goodie bags, and the opportunity for making friends in a supportive environment. **Registration is required.**

Space is limited and will be reserved to those who are currently undergoing breast cancer therapy. Please call the office to reserve your complimentary appointment for A Day of Pampered Healing.

The practitioners of Harmony Health, Inc. are licensed Acupuncturists and Board Certified by the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM); Diplomats in Oriental Medicine (NCCAOM); Completed additional training and internships at the Guangzhou and Provincial Hospital, Guangzhou University of Traditional Chinese Medicine in Guangzhou, China.
